

Planet Saving Products

Out of this world sustainability!

Wholesale Catalogue

— AUTUMN • 2026 —

Plastic has polluted our rivers and oceans for decades. Even so-called “bioplastics” like PLA only break down in industrial composting facilities that most disposables never reach due to a recycling system that is not fit for purpose. The result? PLA behaves like ordinary plastic, lingering in landfill for generations and adding to the crisis it claims to solve.

STOP THE GREENWASHING!

Planetware offers the next generation of takeaway packaging:
100 % plastic-free, home-compostable and ZERO TREES USED!

100 % Organic – Zero Trees Used

Our entire range is crafted from bamboo pulp, a fast-growing grass, and sugarcane bagasse, a by-product of the sugar industry. No forests are felled, so every item in our Planetware range is outside the scope of the EU Deforestation Regulation (EUDR).

Plastic-Free from Start to Finish

Products are shipped in bamboo pulp cartons with bamboo paper packaging—zero plastic in the product, the box, or the wrap.

Smart Carbon Offsetting

We calculate and offset all emissions from production through delivery using our Smart Offsetting™ scheme, lowering the carbon footprint of every order.

Giving Back Through the Naked Planet Foundation

Up to 5 % of gross profit from every sale supports global projects that fight climate change, protect biodiversity, cut pollution, and champion compassionate capitalism.

“Our mission is to bring **Gold Standard green solutions to market at the right price — driven by honesty, integrity, and a commitment to environmental responsibility”**

Stephen Wheeler CEO & Co-Founder

Our Eco-Credentials

Planetware products are designed with sustainability at their core. Here's what our key eco-credentials mean for you and the planet:

100% Sustainable

All Planetware products are made from renewable, responsibly sourced materials. This means minimal environmental impact and long-term resource protection—no greenwashing, just genuine sustainability.

100% Biodegradable

Our products naturally break down into non-toxic components over time, helping to reduce landfill waste and environmental pollution. No industrial processing needed—just nature doing its thing.

100% Compostable

Suitable for both commercial or home composting, our items break down fully into nutrient-rich compost within 90 days, leaving behind zero residues.

Zero Plastic & Bioplastic

We reject both traditional plastics and so-called “bioplastics.” Our products contain absolutely no hidden polymers or synthetic binders—just plant-based, chemical-free materials.

Zero Trees Used

We never use virgin wood pulp or paper made from felled trees. Instead, we rely on agricultural by-products like sugarcane bagasse, bamboo pulp, and recycled fibres—leaving forests untouched. All of our products are outside the scope of the EUDR and any future UK Forest Risk Commodity (UKFRC) legislation.

UK & EU Single Plastics Legislation

Planetware products are fully compliant with both the **UK 2020 Single-Use Plastics Ban** and the **EU 2021 Single-Use Plastics Directive**, meeting regulatory standards across all markets.

SINGLE-USE
PLASTICS
BAN

SINGLE-USE
PLASTICS
DIRECTIVE

Plastic Wet Wipes Ban – New UK Legislation

The UK Government has introduced legislation to ban the sale and supply of single-use wet wipes containing plastic. The regulation aims to reduce plastic pollution, prevent microplastics entering waterways, and reduce sewer blockages caused by wipes that do not break down when flushed.

The ban applies to a range of products including baby wipes, cosmetic wipes, personal hygiene wipes and household cleaning wipes where plastic fibres are present. Plastic-free wipes made from natural or biodegradable materials are not affected.

Naked Planet offers a range of plastic-free, flushable eco-wipes designed as a sustainable alternative to traditional wet wipes that contain plastic fibres, supporting the transition away from plastic-based wipes.

Why choose Planetware cups?

It's very simple!

Disposable Cup

PLA & Wood-Paper
Disposable Cup

- ✓ Made from **100% sustainable** organic bamboo pulp
- ✓ **Bamboo** is the fastest growing plant on earth
- ✓ **100% home compostable**
- ✓ Biodegrades in **60-90 days**

CHEMICALS

- ✓ No **harmful** glues or chemicals
- ✓ Natural water-based lining

LID

- ✓ Sugar Bagasse lid
- ✓ **100% home compostable**
Biodegrades in **60-90 days**

LEGISLATION

- ✓ Conforms to UK/EU single-use plastic bans
- ✓ Outside scope of EU/UK/RC deforestation regulations

- ✗ Made from **unsustainable wood**
Contributes to **deforestation**; up to **20 million trees** per year
- ✗ Only biodegrades fully at industrial composting sites

CHEMICALS

- ✗ Internal PLA **plastic** lining
- ✗ Releases **harmful chemicals** at boiling point

LID

- ✗ PLA **plastic** lid
- ✗ Can take **100 years** to **break down** into microplastics in landfill

LEGISLATION

- ✗ Requires **EU ban** logo
- ✓ Wood-based paper is legally regulated by EU/UK/RC deforestation regulations
